<b>Total No. of staff-months of the assignment:</b> 6 man-months	<b>Names of Planair staff members involved in the project:</b> Jérôme Attinger, Joël Maridor, Ramzi Karoui
<b>Description of Project:</b>  The project is part of the Integrated Urban Development Programme of the city of Sousse. Planair is in charge of Component 2: Implementation of an energy master plan.  The master plan is set up based on the energy city approach ("cite de l'énergie")/European Energy Award in collaboration with the "Alliance des communes pour la transition énergétique" programme of the Tunisian National Agency for Energy Conservation (ANME).  The activities are as follows: <ul style="list-style-type: none"> <li>- Public lighting: Drawing up a lighting plan giving the strategic orientations concerning the lighting development and evaluation of the lighting management mode.</li> <li>- Public buildings: Renovation plan/strategic orientations for new municipal buildings and in particular the eco-design of the new town hall. Generalise the use of solar energy for the most energy-intensive municipal buildings.</li> <li>- Vehicles : Fleet management plan and fuel management (focus: waste collection)</li> <li>- Residential buildings: Ecoconstruction (collective/individual) of a district of the city and support for the local manufacture of solar water heaters.</li> <li>- Tertiary buildings: Promoting the use of solar energy in the hotel/tourism sector in collaboration with ANME and STEG (Tunisian Electricity and Gas Company).</li> <li>- Industrial sector: support to be defined according to the needs during the project.</li> </ul>
