

Project name: Support for the national energy transition plan for municipalities in Tunisia	Approx. value of the contract Total value: approx. 3,597,000 USD Value of the Planair mission Approximately: 395,000 USD
Country: Tunisia	Duration of assignment: Start date: February 2019 Completion date: January 2021
Name of Beneficiary/Client: National Agency for energy conservation (ANME) Tunisia Funding: Switzerland: State Secretariat for Economic Affairs (SECO) of the Swiss Confederation	Project Partners: Planair is leading the consortium with local partners: (IDE-E and Alco) and international partners (URBAPLAN et Transitec).
Total No. of staff-months of the assignment: 63 man-months in total of which 12 for Planair	Names of Planair staff members involved in the project: Jérôme Attinger, Joël Maridor, Ramzi Karoui

Description of Project:

The project to support the national energy transition plan of the municipalities in Tunisia, introduction of the ACTE/MEA label comprises four main components:

- 1) Supporting the ANME in carrying out energy audits of the municipal assets and to set up an energy accounting system in all the Tunisian municipalities.
- 2) Introducing an ACTE/MEA structure at national and regional level. ANME has a multidisciplinary structure and a competent, efficient and motivated staff; it is in a position to offer support (technical and financial) that meets the needs of the municipalities, and to certify the municipalities that will have the energy performance required by the ACTE/MEA label.
- 3) Technical support to 7 pilot municipalities and training of 7 relay experts to accompany the ACTE/MEA process. They are able to implement the related actions and actively share their experiences with their counterparts in Tunisia and in the MENA region. Municipalities are certified ACTE/MEA at the end of the project.
- 4) Implementation of priority actions in the 7 pilot municipalities (quickwin projects).
